

Color scales map from data values to an output range of colors

## Setting colors

Set colors by choosing from one of the many schemes (see below) or by manually declaring a range of colors.

```
Plot.plot({
  marks: [
    Plot.dot(data, {
      x: "date", y: "air_temp", fill: "air_temp"
    })
  ],
  color: {
    type: "linear", scheme: "turbo", legend: true
  }
})
```

### Multi-hue

### Diverging

### Single hue

### Categorical

### Cyclical
